## UNILABTECH

The UniLabTech Srl company was born as the first company in Italy to have obtained triple accreditation and status at the same time, i.e. both as an Innovative Startup with a Social Vocation (SlaVS) and as an Incubator and Accelerator of Innovative StartUps, for which the appropriate requirements have been recognized for obtaining the necessary authorization as well as official registration with the Chamber of Commerce of Milan, Monza and Lodi and the Ministry of Economic Development as well as other Italian entities.

## CORE BUSINESS

The core business of Unilabtech is mainly aimed at Scientific and Technological Innovation in the Social and Third Sector for the design and development of Innovative Projects and Solutions for Social, Cultural and Humanistic purposes.

The main experiences and activities are R&D in Smart Solutions, Industry 4.0 and System Integration (ICT / AR / VR / IoT).

The business development of Unilabtech is also structured with its constant protection of the intellectual properties of the brands, formats and patents filed, with which to then create the related Internal Departments and then make them Spin Off in Innovative StartUp in its company group (Unilabtech Industries).

# COMPANY PROFILE

## WWW.GOVTECHDISTRICT.XYZ

### PROJECT IDEA

With our "GovTech" Think Tank, we have created the first Government Innovation District in Italy (GovTech District), within which Innovation and Institution merge for a complementary strategic cooperation with humanistic and social purposes. GovTech wants to reform, simplify and make efficient institutional and bureaucratic processes by demonstrating that companies can collaborate with the state and with the institutions, through innovation, for the well-being of citizens.

### VISION

We are the creators of the term "GovTech", which represents the fusion between the English-speaking terms "Government" and "Technology" which later became the Registered Brand of the Think Tank.

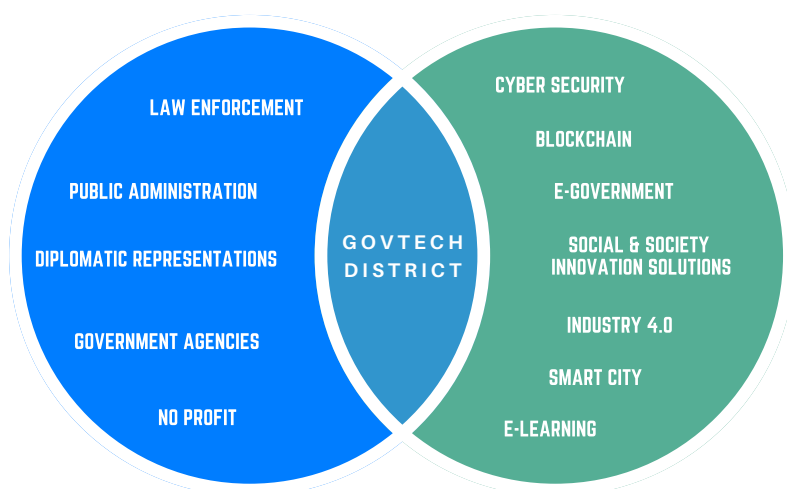

Unlike E-Government, which deals with the use of innovative technologies for the digitization of internal processes and the interactions of the Public Administration, GovTech defines Research and Development of innovative technologies with Government and Institutional Bodies that intend not only to evolve their structures and services but to develop together with companies innovative solutions for citizens and the national territory for better territorial control and greater social security and well-being.

### PLUS VALORE

- Business Innovation Center (B.I.C.) Certified
- StartUp Incubator & Accelerator Certified
- Area for Co-Working and Design Thinking
- Area for User Experience / AR - VR - IoT Demo
- Area for Events and Hackaton
- Product Exposition Area of the GovTech E-Shop
- Equipped Research and Development Laboratories
- Meeting Room with Relax Area
- Room for training courses / conferences

## when the institution meets innovation
